Professional Profile

Cloud and Infrastructure Engineer with 20+ years of experience designing, automating and operating enterprise infrastructure in global environments. Combines deep systems expertise with software-driven automation, translating business requirements into architecture and production solutions using PowerShell, Python, APIs and SQL. Experienced across Linux, virtualization, identity and cloud platforms, with a track record of eliminating manual operations and accelerating service delivery at enterprise scale.

Core Technologies

Automation & Development: PowerShell, Python, Bash, REST APIs, Microsoft Graph, SQL, Git, GitLab
Cloud & Identity: AWS S3, Route 53, Azure, Entra ID, Active Directory, Microsoft 365, SSO, SAML, MFA
Linux & Infrastructure: RHEL, Ubuntu, Debian, SUSE Linux Enterprise (SLES), VMware vSphere, Hyper-V, Windows Server
Networking: TCP/IP, DNS, DHCP, routing, VLANs, VPNs, firewalls
Infrastructure as Code: Terraform

Professional Experience

ESMO Lugano, Switzerland

Senior Infrastructure Architect Jul 2025 - Sep 2025

- Supported application teams managing AWS Route 53 infrastructure through Terraform and designed Single Sign-On integrations with Microsoft Entra ID.
- Helped define the infrastructure roadmap for migrating remaining on-premises workloads to an Azure-based cloud environment, including identity, compute and endpoint-management architecture.
- Remediated application packaging and distribution across geographically distributed endpoints, developing custom PowerShell automation for remote-site deployment requirements.

Envista Holdings Corporation Zurich, Switzerland

Senior Systems / Cloud Engineer Sep 2019 - May 2025

- Led the architecture and development of infrastructure automation for a global environment of approximately **25,000 users and endpoints**, owning solutions from business requirements and technical design through production code and implementation.
- Automated approximately **90% of previously manual service-provisioning activities**, integrating HR, identity and cloud platforms and helping reduce new-hire provisioning lead time from approximately **three weeks to one week**.
- Built an employee-lifecycle automation platform integrating Workday, Active Directory and cloud services for hires, terminations, transfers and management changes, with SQL-backed state management and validation to prevent repeated actions.
- Engineered reusable PowerShell modules and Python integrations for production workflows, with API connectivity, structured logging and error handling.
- Designed an AWS S3 archival workflow with checksum verification, PGP encryption and SQL-backed tracking. Built a custom PowerShell module using C#/.NET and Bouncy Castle; added failure notifications, manual-review staging and controlled local retention.
- Automated Entra ID and Microsoft 365 administration through PowerShell and Microsoft Graph, including dynamic group-based licensing, identity workflows and MFA-related operations.
- Designed and operated Azure Automation environments for production runbooks and introduced an on-premises GitLab platform for source control, issue tracking and technical documentation across multiple teams.
- Designed automation supporting the migration of approximately **150 TB and 280+ million items** between Microsoft 365 tenants following Envista's separation from Danaher.

Danaher Corporation Ticino, Switzerland

Senior Systems Engineer Jan 2017 - Sep 2019

- Designed and developed enterprise infrastructure automation using PowerShell, Python and C#, focusing on identity lifecycle, systems integration and service provisioning.
- Integrated Workday with Active Directory and Microsoft 365 to automate employee lifecycle processes from onboarding through post-termination deprovisioning.
- Served as architect for endpoint privilege management across **15,000+ workstations**, eliminating local administrator access while automating policy and request workflows.
- Designed Active Directory automation through One Identity Active Roles and integrated BMC Remedy with Active Directory, SCCM and System Center Orchestrator for automated request fulfillment.

IBM Zurich, Switzerland

IT Product Specialist / Infrastructure Consultant Aug 2011 - Dec 2016

Linux Systems Engineer Aug 2011 - Dec 2012

- Designed and delivered enterprise infrastructure, migration and automation solutions across Linux, Microsoft and VMware environments for major Swiss and international clients.
- Architected Active Directory, messaging, virtualization and systems-management solutions and led complex infrastructure migration engagements.
- Served as technical SME and escalation point within a 20-person engineering team while managing technical relationships across approximately 40 client accounts.
- Led an enterprise Microsoft 365 migration that reduced messaging infrastructure costs by approximately **40%**, and delivered monitoring improvements for a Swiss financial institution that reduced troubleshooting effort by approximately **60%**.
- Automated recurring builds and component startup with Bash on SUSE and Red Hat Linux, and OS deployment using YaST and Kickstart, working with a customer development team.

Earlier Career

Spectraseis AG: *Systems Engineer* Zurich | 2010-2011

Led infrastructure work for the relocation of data center services from Switzerland to the United States across VMware, storage, networking and Linux/Active Directory environments, contributing to an estimated 40% reduction in infrastructure costs.

Eidos: *Senior Infrastructure Trainer / Systems & Network Engineer* Rome | 2007-2010

Delivered advanced infrastructure training and provided architecture, virtualization, storage, security and Level-3 engineering support across Microsoft and Linux environments.

Independent IT Infrastructure Consultant Italy & Spain | 2002-2010

Delivered infrastructure architecture and migration projects for clients including Bulgari, ENAV, Ghella Group, Q8 Petroleum and Microsoft Italy.

Earlier Certifications

Red Hat Certified Engineer (RHCE) | VMware Certified Professional (VCP) | Microsoft Professional Certifications | Novell Certified Linux Professional | Ubuntu Certified Professional
